

## Health Management and Education

Competition owners, participants and spectators all have a role to play in ensuring that netball can be resumed in a safe, controlled and successful manner in a Covid-19 environment. The following conditions of resumption relate to health management and participant education.

### Education

- Competition Owners must electronically provide participants with copies of Netball Tasmania's Covid-19 Management Plans prior to resumption of competition.
- Notices must be posted at the entrance to all venues advising that anyone unwell may not enter.
- Hygiene and health management posters are to be posted throughout competition venues to inform and remind attendees of expected behaviour.
- Competition Owners must place Netball Tasmania's Covid-19 Management Plans in a prominent place in the venue.

### Resumption of Netball

- To assist with contact tracing, spectators and participants are encouraged to download the Australian Government COVIDSafe app.
- Clubs and Competition Owners must ensure that attendance registers are kept for all trainings and matches to assist with tracing if required.
- Any participant or spectator who has been unwell during the 14 days prior to the scheduled resumption of netball, or who has been in close contact with someone who has, or is suspected to have, Covid-19, must not return to netball until assessed by a doctor and granted medical clearance.

### During Netball

- Clubs will be responsible for ensuring that their participants and spectators adhere to hygiene and health conditions contained in the Plan.
- Participants and spectators are not to attend netball training or competition if they become unwell, or have had close contact with someone who has, or is suspected to have, Covid-19.
- Participants seeking to return to netball after being unwell, or after having had close contact with someone who has, or is suspected to have, Covid-19 should be assessed by a doctor and obtain a medical clearance.
