

2022 Covid-19 Management Plan

Netball Tasmania Member Associations are required to adhere to the following conditions to ensure that standards are implemented which effectively manage Netball training and competition whilst there is an ongoing presence of Covid-19 in Australia.

Bio-Safety Officer

Associations should appoint a Bio-Safety Officer, responsible for staying up to date with Covid-19 related management requirements. The individual should be advised to Netball Tasmania to ensure all Covid-19 Management related communications are received. The Bio-Safety Officer will also be responsible for implementing, managing, and reviewing practices which ensure that applicable management requirements are met.

Venue Attendee Limits

Where managing facilities, Associations must ensure that they adhere to the gathering limits outlined in the State Government Framework for Covid-19 Safe Events and Activities in Tasmania. Details of, and updates to, these limits are available here <https://www.coronavirus.tas.gov.au/keeping-yourself-safe/gatherings-density-and-physical-distancing>.

Where hiring facilities Associations must ensure that they are aware of, and that they run their competition in a manner which adheres to, the gathering limits imposed by the applicable venue. When developing competition rosters, Associations should consider the timing of matches, and whether restrictions should be imposed on a 'per team' basis, to aid in the management of overall attendee numbers

Check-In Tas

Check-In Tas is to be used where venue limits exceed 250 patrons indoors and 500 patrons outdoors. Use the above site referenced in venue attendee limits to determine the need to apply for additional patrons as a Tier 1 or 2 venue.

Health and Safety *Notifications*

Signage must be present at each entrance to a venue which advises attendees as follows:

- Wear a face mask (at events hosted by Netball Tasmania with over 1000 attendees only)
- Do not enter the venue if you are sick
- Maintain physical distancing where able
- Maintain hand hygiene
- Practise respiratory hygiene

Participants should also be discouraged from sharing drink bottles, food or sweat towels. Where possible, floor stickers or signage should be visible encouraging physical distancing when lining up for canteens or toilets, or where queuing is required to enter the venue.

Sanitising & *Cleaning*

Associations must ensure that sufficient hand sanitising stations are located throughout the venue and refilled regularly. Sanitising station with wipes/spray etc. should also be present on each competition court to allow for teams or individuals to sanitise their seat/bench prior to use. Associations must ensure, or liaise with applicable venue owners to ensure, that appropriate cleaning practices are in place, including the more frequent cleaning of high use areas such as toilets and change rooms.

Cashless *Payments*

Associations should endeavour to provide cash free payment systems and discourage payment with cash. Sanitiser should be available near any keypads etc. required for use with cash free payment systems.

Scoring & *Benches*

Where individuals are required to sit together to score matches, or run a full bench in TNL competition, individuals must physically distance, should avoid sharing equipment (pens, scorepads etc.) and hand sanitiser must be made available.

Positive Case Response

In the event of a positive case, follow all directions as dictated by Public Health.
